Flung: The up side of down

Contemporary design gallery 19 greek street and sketch curate *Flung*, an exhibition for this year's edition of the London Design Festival.

5 installations by 4 designers form an emotional and experimental landscape where disruption is a birthplace for new perspectives. The selected works each depict an awkward or deformed restaurant scene in which catastrophe has disrupted the course of normality. Tilted tables, deformed chairs, mummy-like seating, and a flung upside-down suspended restaurant demonstrate how catastrophe can, unintentionally, create beauty.
