19 September - 6 November

Sé creates beautiful furniture collections by uniting exciting designers with a strong lineage of producers across Europe. Founded in 2007 by Pavlo Schtakleff, Sé has introduced three critically acclaimed collections, respectively designed in full by Nika Zupanc, Jaime Hayón and Damien Langlois-Meurinne. This year, Sé received the prestigious ICFF Editor's Award for 'Best Furniture'. Each collection draws on the unique inspiration of the designer, a signature colour palette, soft, whimsical shapes with minimal angles and the highest-level quality craftsmanship.

Collection III by Nika Zupanc continues Zupanc's design narrative alluding to 1950s furniture and modernist influences. The collection brings Zupanc's aesthetic together with Sé's craftsmanship and signature feel, and is a balance of wit, restrained elegance and luxury while subtly introducing symbols and motifs associated with the power of sport. The materials include a selection of the finest woods, metals, marbles and fabrics. The shapes are dynamic and light, and like all Sé furniture, each piece can be customised and used within commercial and domestic environments.

Nika Zupanc has quickly established herself as a critically acclaimed designer who consistently questions prescribed ways and challenges the norm. This ability to think autonomously and to re-interpret culturally accepted norms leads her to produce designs of timeless elegance, subvert convention and assumptions as well develop new ways of using technology and pushing material processes. Zupanc's products have been heralded as future classics.
